PACKS

THE ADVANTAGES OF OUR TYING MACHINES:

The market's
quickest tying
cycles: just
6.8 seconds
for bending and
loosening by
single or double
turns.

Smooth
integration into
rolling mill
layouts under
any operating
conditions.

Latest
technologies,
automatic
configuration
and operation.

Reduced
downtime,
accelerated the
job in-site
processes and
defeated adverse
effects caused by
tying steel
manually.

All Tying Machines are fully produced, assembled and tested in our workshops in Northern Italy before shipment to the site. This reduces the start-up times and lost opportunity costs.
