

FAT completed for n.2 automatic TMB 400–45 in Oman

The **ATS team** successfully completed the activities on TMB 400 - 45 tying machines, which will be installed in the customer's facility in Oman.

The two automatic tying machines will be included in a processing line for the final tying of 400x400mm max size round bundles. The supply will be completed with auxiliary mechanical equipment, a hydraulic circuit, electrical and automation system.

The 400-45 model features a special design compared to the standard one, with 45-degree inclined/lateral twisting, which will guarantee, like the whole range of products in the portfolio, a complete double turn tying in just 6.8 seconds.

About Companies:

ATS Mechatronics is specialized in the design, manufacturing and commissioning of equipment for metal industry plants. The headquarters is in the Northeast of Italy in Trasaghis (UD). Particularly, tying machines for bundles and packages have reached a very high level of customer satisfaction and become one of the leading products in the market. Since 2019 it is part of the AIC Group, a renowned global system integrator providing advanced and tailored automation and mechatronics solutions for the steel industry, with the aim to continuously improve the efficiency, competitiveness and safety of the production processes.

Established in 1996, **Al Jazeera Steel Products Co.** (formerly known as Al Jazeera Tube Mills Company) is an Oman-based manufacturer of steel products. The company operates through two state-of-the-art facilities - tube mill (TM) and merchant bar mill (MBM), with a product portfolio spanning across black pipes, galvanized pipes, hollow sections, merchant bar mill products and rebars.
